

## **IRD Engineering to lead the supervision services within the Road Rehabilitation and Safety Programme in the Republic of Serbia**

*The project will be implemented by a consortium composed by IRD Engineering and IRD Engineering doo, its subsidiary company in Serbia.*

In 2013, the European Investment Bank (EIB), the European Bank for Reconstruction and Development (EBRD), and the World Bank (WB) approved three loan agreements totaling EUR 274 million aimed at supporting the rehabilitation and safety improvement of about 1,100 km of roads across the Serbian national road network. The joint facility was named Road Rehabilitation and Safety Program (RRSP). The RRSP project represents the support to the Government of Republic of Serbia in implementation of National State Road Network Rehabilitation Program for the period of 2014-2019. This Project is expected to promote regional and national economic growth, facilitate trade, support private sector development, and ultimately contribute to economic and social cohesion in the country.

The RRSP involves in total 54 road sections according to the priority list provided by analysis of roads condition and economic-feasibility-investment indicators where their evenly geographical distribution was seriously taken into account. The next map shows all the sections that are integral part of the RRSP project:

Consulting Services for **Supervision and Rehabilitation Works including environmental and social safeguard monitoring on RS/WB/EIB Sections under RRSP** are implemented by the JV IRD Engineering srl and IRD Engineering doo, and cover 31 section all over the territory of Republic of Serbia in total length of 670km. The implementation period for these Services is planned for the

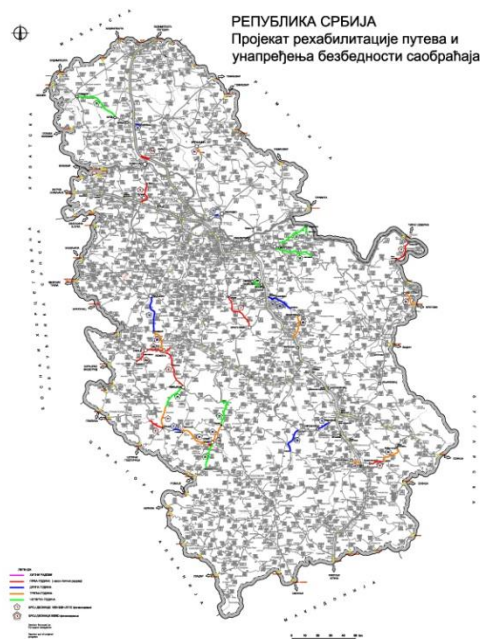

period of 2018-2020. During the works execution, the contract conditions that will be applied will be the contract conditions for preparation of **SBD for Procurement of Small Works** (the World Bank). The Services include:

- Establishment of systems of managerial control for Civil Works Contracts;
- Administration of Contracts;
- Control over estimated works quantities and contract outcome costs, progress of Works and technical records;
- Control and acceptance of contractor's interim and final payment certificates;
- Control and approval of Contractors' key staff, insurances, guarantees, licences, programs, method statements, laboratory provisions and testing, etc.;
- Direct supervision of works and monitoring of progress;
- Preparation of various Reports;
- Control testing of all materials incorporated into permanent works and the all executed works.

The main objective of the Project is to assist the PE "Roads of Serbia" to successfully implement RRSP project trough provision of high expertise and effective contract management, with special attention to environmental and safeguard monitoring in regards to the Works and mitigation of the observed negative impact.

The Consultant established the team for performing the Supervision services of highly experienced engineers, where there are 4 Key Experts and 41 Non Key Experts, licenced engineers in various field of expertise. The team consists of international and local experts with deep knowledge of relevant Serbian laws and regulations.

The next map shows all the RS/WB/EIB sections under RRSP that are covered with these Consulting Services:
